November 4...Talladega County 9 - 1 PM. Fall Forestry Field Day/Landowner Tour on the Jim Cassi-dy property in Munford. Topics include: timber sales, recreation management, wildlife management, food plots, prescribed burning, longleaf management, timber stand improvement, and streamside management zones. BBQ lunch provided. For more info call Thomas McDaniel at (205) 669-5121.

November 4...Talladega County 9 - 11 AM. Pecan Management Workshop at Talladega County Extension Office, 130 N Court Street, Talladega. Topics include: Site selection, Varieties, Proper planting, Fertilization, Weed control, and more. Pre-register by calling (256) 362-6187.

November 5-6...Marion County. Alabama Adult Trappers Education Workshop in Hamilton passes on the historical aspects of trapping, biological information concerning furbearers and furbearer management, and allows students to learn the proper techniques that include the use of trapping as a sound wildlife management tool. Fee: $7BD. Contact Mike Siever-ing at (205) 339-5716.

November 7...New Albany, Mississippi 8:30 AM - 4 PM. Alternative Sources of Forest Income at Union County Extension Office, 112 Fairground Circle. Topics include: Overview of specialty woods, Agro-forestry, Christmas Tree farming, Managing for utility poles, Pine straw, Business aspects of recreational leasing, and more. Fee: $34; lunch included. Call Gina Wills at (662) 534-1917.

November 7-10...Newton, Georgia. Ecological Forest-ry Workshop at Joseph W. Jones Ecological Research Center, 3988 Jones Center Drive. This program is designed as an alternative to production oriented silviculture and focuses more on management of natural areas and multiple use properties. Fee: $430; meal and lodging included. Contact Jessica McCor-vey at (229) 734-4706.

November 8...National & Statewide. Election Day for Presidential and Congressional elections. Do you know what choices you’ll have to make? Sample ballots for each Alabama county are at Alabama-Votes.gov. Click on the “Sample Ballots” icon. Then, do some research on the candidates and amendments you’ll be voting on come November 8. There is an explanation of each of the 14 Statewide Amendments written by the Fair Ballot Commission whose purpose is “to provide to the public a fair and accurate explanation of what a vote for and what a vote against a statewide ballot measure represents.” Go to Alabama-Votes.gov and click on the “Ballot Measures” box.

November 8...Multiple Counties. Property Tax Votes

- Sumter County voters will decide on a six mill property tax increase.
- Franklin County voters will decide on a Fire Protection Service Fee (AFA Property Tax). A $26 per year fee will be voted on come November 8. Fire Department Districts. We don’t know if the “fee” will apply to forest or agriculture land, but Franklin County voters should check this out. See page 3, middle column of the October 2016 newsletter for a forest landowner’s perspective on Fire Dues.
- Marion County voters will decide on a three mill property tax increase.
- Some Marshall County voters will decide on a $120 per year “fire service fee” for Volunteer Fire District 35.
- Tallapoosa County voters will decide on an annual 950 per residence and $100 per com-mercial business fire protection ‘fees’ in the Tallassees Fire District. Forest and farm land-owners should check to be sure these new fees do not apply to them. See page 3, middle col-umn of the October 2016 newsletter for a forest landowner’s perspective on Fire Dues.

November 9...Blount County 9 AM. Natural Re-sources Planning Committee Meeting at USDA Confer-ence Room, 55545 US Hwy 231, Oneonta. Forest landowners are welcome to attend and participate in this meeting. Contact Merry Gaines at (205) 274-2363x3.

November 9...Online 12 PM Noon CT. Fire Retardant-Treated Wood: The Basics Webinar. Tell your builder and architect friends about this webinar. Email any questions to Karen Droste at karen@woodworks.org.

November 10...Covington County 9:30 AM - 3 PM. Forest Forum on At-Risk Species Listings, Managing for Economic Returns & Utilization of Cost Share Programs at the Solon Dixon Forestry Education Center, 12130 Dixon Center Road, Andalusia. The agenda and dialogue will focus on at-risk species listings, rulings, and the impact on managing forestland for economic returns, as well as the utiliza-tion of cost share programs. RSVP Greg Pat e at gpat@forestlandowners.com.

November 10...Clarke County 5:30 - 7:30 PM. Tim-ber Tax Workshop at the Civic Center, 559 West Front St., Thomasville. Topics include: Acquiring land, Determining basis, Timber sales income, Deple-tion allowances, Reporting income to the IRS, and Expenses. Forester and Logger CPE points available. Fee: $20. To pre-register call Clarke County Exten-sion at (251) 275-3121.

November 10...Covington County 6 PM. Wild Game Cook-Off at the Covington Center Arena, Andalusia. Attend the cook-off and enjoy live music, door prizes, youth activities, and sample wild game recipes. Fee: $40; Youth under 15 free. Call the Alabama Wildlife Federation at 1-800-822-9453.

November 10...Cleveland, Mississippi 6 PM. Mid Delta Forest, woodland and Wildlife Association Meeting at the Bolivar County Extension Office. Dr. Stephen Dicke will present “Tax Talk”. Contact Laura Giacaglia at (662) 843-8362.

November 12...Lee County 8 AM. Horse Ownership Resources, Skills, & Education for Youth at the Horse Unit & Beef Teaching Unit, Auburn University. Activi-ties include: Trailer safety, Buying/Leasing Your Next Horse, Horse Judging, Digestive Tract Problems, and Trail & Exercise Physiology. Fee: $20. Contact Dr. Betsy Wagner at (334) 844-7503.

November 12...Baldwin County 9 AM - 4 PM. Annual Stockton Sawmill Days at Live Oak Landing, State Highway 225, Stockton. Witness log-rolling, pole climbing, cross-cut sawing, boom walking, and other activities performed by professional lumberjacks. Other items of interest: portable sawmills operating, circular saw blade sharpening, basket making, syrup making, and much more. Bring a lawn chair. Fee: $10; discount for children. Contact Lynn Bozone at (251) 937-3738.

November 15...Webinar Noon CT. Introducing Teens and Young Adults to the Family Enterprise presented by The Family Business Consulting Group (FBCG). Fee: $129. Call FBCG at 1-866-972-5840.

FOREST PROFILES:
CONSULTING FORESTERS by Jessica Nelson

Thomas Lang, owner of Lang Forestry Consultants in Selma has been a consultant for four years, but served landowners through the Alabama Forestry Commission for 25 years. He says that aside from a quarter century of experience, contacts, and knowledge, working for the AFC gave him communication skills he wouldn’t have had as a young forester. In addition, working with a local timber buyer helped him get a handle on fast-changing markets. “It’s a complicated business,” Lang says. “A lot of landowners need help understanding timber markets and timber sale strategies.” Working for the state helped him build up a web of connections, so he knows exactly who to call to help his clients get the work done. The bulk of his work is timber sales and appraisals for private landowners, many of whom he’s known for more than 20 years. Trust and patience are two of his key principles, especially with new clients or ones who aren’t familiar with the industry. “I think landowners feel better if they can have options,” Lang says. “My job is to lay out as simply and clearly as I can the options that make sense and let them decide.” His number one priority is making sure he always has time for his clients. “I don’t want to be too busy to return a phone call.”

The Louisiana Pacific Corporation mill in Thomasville has been fully operational since early 2013. The Clarke County location of this global engineered-wood powerhouse produces LP® OSB sheathing. They produce commodity panels, oversize panels of 8-, 9-, or 10-foot lengths, and LP® TopNotch® 250 subflooring, a tongue and groove flooring product. In 2016, LP invested in an expansion to add LP® Flame-Block® fire rated OSB sheathing to their lineup. Non-combustible, fiberglass-reinforced Pyrotite® is added to the panels currently made at the plant for use primarily in multi-family housing like apartments or dormitories as well as garages or other places where fire-rated sheathing is required. LP uses primarily southern yellow pine, but will accept small amounts of soft hardwoods like gum or poplar. The company purchases wood exclusively through forest management and timber procurement systems that are certified through the Sustainable Forestry Initiative. Their core-supplier system keeps area suppliers and wood dealers in tune with the mill’s needs. Clarke County’s panels are shipped via rail and flatbed trucks to markets across the southeast, and occasionally to port cities for world-wide distribution. “We are excited to see the economy gaining strength and with that comes more housing starts.”
Tax Tips for Forest Landowners for the 2016 Tax Year
by Dr. Linda Wang
National Timber Tax Specialist
U. S. Forest Service

This report provides up-to-date federal income tax information affecting timber transactions. It assists woodland owners, logging professionals, foresters and their tax accountants in filing the 2016 tax returns. The information presented here is for educational purpose only and is not intended for legal or accounting advice. It is current as of September 30, 2016. R8-MB 150

Types of Timber Property
Income and expenses associated with timber property that is held for different purposes are subject to different tax rules. Timber property held mainly for personal-use purpose (personal enjoyment vs. income generation) may have little or no tax deductions. Property held as an investment (profit from growing timber or expectation of future profit from asset appreciation) is eligible for tax deductions. Property held as business is where your commercial timber activities are regular, active and continuous. Business expenses are deductible but are subject to passive loss rules (i.e., if your participation in the business is not material, loss deductions are limited). Which tax status your property falls under depends on the specifics of each case as the tax regulations only provide the general guideline.

Example 1: Mr. Smith owned a 30-acre timber tract. The consulting forester he worked with helped him manage his timber for profit. This year, the forester administered a final harvest on his behalf and sold timber for $10,000 profits. Smith report the transactions under the investment property.

Example 2: Mrs. Thompson used her property primarily for family retreat and personal enjoyment. She treats her property as personal-use property. Gains from the timber sale are taxed as capital gains. Timber sale expenses may be subtracted from the gross sale proceeds to calculate the taxable gain. Property taxes paid may be deductible, however, timber expenses may not be deductible for personal-use property.

Timber Expenses
Expenses paid for timber management for profit-making purposes are deductible. Examples of such expenses are: firebreak maintenance, overnight travel costs, property taxes, fees to a consulting forester or accountant, cost for vegetation competition control, or for insects, disease and fire control, expense for pre-commercial thinning, and depreciation from equipment used. Investment timber owners may deduct expenses on Schedule A, but they are subject to a 2 percent of adjusted gross income (AGI) reduction (as "miscellaneous itemized deduction"). Business timber owners who are “material participants” deduct them in full on Schedule C.

Example 3: You paid $800 for firebreak maintenance and $200 for a woodland management plan. Your timber is an investment property and your AGI was $40,000. Your timber expense deduction is $200 ($800 + $200 - 2% x $40,000) due to the 2 percent AGI floor.

Timber Basis and Deduction
Basis is the amount of investment in the timber asset to a particular owner. Specifically, for purchased property, the timber basis is the amount you paid for it. For inherited property, the basis of timber is its fair market value (FMV) on the decedent’s date of death.

Example 4: You inherited a 98-acre woodland five years ago but didn’t set up the timber basis at that time. Now you worked with a consulting forester who provided a reevaluation of the timber quantity and value on the date of the decedent’s death. Your timber basis was established to be $25,000 of 100 thousand board feet of pine sawtimber and $4,000 of 200 cords of pine pulpwood. If you receive the timber as a gift, the timber basis is the lower of its FMV or the donor’s basis.

Timber basis reduces your taxes because you can deduct from timber sales (depletion deduction) or claim a timber loss deduction in the event of casualty.

Example 5: You sold 50 thousand board feet of sawtimber in 2016. Your depletion deduction from the sale is $12,500 ($25,000 of total timber basis ÷ 100 thousand board feet of total volume x 50 thousand board feet of timber sold).

Timber Sales
Sale of standing timber. Sales of standing timber held for an investment more than 1 year qualify for long-term capital gain, however, only 25 percent of the decrease in fair market value is taxable. Report the sale of standing timber held as an investment on Form 8949 and Schedule D.

Example 6: In 2016, you sold standing timber owned as an investment. You reported it as a capital gain on Schedule D and Form 8949.

Sales of standing timber by a business qualify for long-term capital gain (Sec. 1231 gain) if the timber has been held for more than 1 year (Sec. 631(b)). Report the sale on the appropriate Form (see “Filing Form T” below).

Sale of products cut from timber held for use in a business (Sec. 631(a)). If you cut your own timber or have it cut by a contractor working at your direction, either for sale or for use in your business, the gains are ordinary income unless you elect to use sec. 631(a) on Form T, Part II.

Example 7: The FMV of your standing timber was $24,000 on Jan. 1 and your basis in it was $2,000. You paid a contractor $3,000 to cut standing timber held for business use for over 1 year into logs and you sold the cut logs to a mill for $29,000. If you elect to use Sec. 631(a) on Form T, Part II, you will report a $22,000 capital gain ($24,000 FMV – $2,000 basis) on Form 4797 and Schedule D, and $2,000 ordinary income ($29,000 sale price – $24,000 FMV – $3,000 contractor fee) on Schedule C. Without the Sec. 631(a) election, however, all $24,000 profit will be ordinary.

Net Investment Income Tax
On a separate tax form, you must report AGI over $200,000 (or 250,000 for couples), investment timber sales and passive business timber sales are subject to a 3.8 percent net investment income tax. “Material participants” in timber business are not subject to this tax.

Example 8: Mr. and Mrs. Walter’s AGI is $270,000, including a $40,000 capital gain from their investment property (§5 upward). Any amount over $10,000 (the lesser of the excess of their AGI of $270,000 over the $250,000 threshold or the capital gains of $40,000) are subject to the 3.8-percent tax ($760 tax), in addition to the capital gain tax on the sale.

Installment Sales
An installment sale is a sale in which you receive one or more payments in a tax year after the year of timber sale. Allowing you to defer tax by spreading your gain over 2 or more years. Interest is charged on deferred payments and is ordinary income.

Example 9: You sold $10,000 of timber ($7,500 after deducting timber depletion and sale expenses) in 2016. Your gross profit percentage is 75 percent ($7,500 + $10,000). The buyer paid you $6,000 in 2016 and you received an installment payment in 2017. Report a $4,500 gain ($6,000 x 75%) for 2016, using Form 6252.

Reforestation Costs
Reforestation costs are direct costs incurred to establish commercial timber stands. Taxpayers may deduct up to $10,000 ($5,000 for married couples filing separately) per year of reforestation costs per qualified timber property (QTP). Any amount over $10,000 (the lesser of $10,000 per QTP may be deducted over 84 months (amortized). Trusts are eligible for amortization deduction only.

Example 10: If your reforestation cost was $8,000 in 2016, you may deduct it fully in 2016 for your married filing joint return. If you spent $17,000 to reforest, deduct $10,000, plus 1/14th of the remaining $7,000 ($500) in 2016. Deduct 1/7th of the $7,000 ($1,000) for 2017–2022 and the last 1/14th ($500) in 2023. For investment timber, report the reforestation deduction as an adjustment to gross income on the front of Form 1040. For business taxpayer, report it on Schedule C. Eligible reforestation deductions are reported on Form 4562, Part VI. Attach a statement to your return showing the date, location and amount of the expenditure.

Depreciation and Sec. 179 Expensing
For timber held to produce income, depreciation allows a tax deduction that is based on the cost (basis) of assets used: tractors, machinery, computers, cars, logging roads or the surfaces of permanent roads. For example, logging equipment and light-duty truck are depreciated over 5 years. Land, however, is not depreciable. Also, business taxpayers may deduct up to $500,000 in the first year for qualifying property in 2016, subject to a $2,010,000 annual phase-out and business taxable income limitation (Sec. 179 expensing). Separately, business taxpayers may take bonus depreciation equal to 50 percent of the cost of qualifying new business property.

Cost-share Payments
If you receive a payment from a qualified program, you may exclude from your income as much of the payment from your income as the cost share is used for capital expenditure. Otherwise, it is ordinary income. Qualified federal programs include the Forest Health Protection Program (for southern pine beetle and mountain pine beetle), Conservation Reserve Program, Conservation Security Program, Environmental Quality Incentives Program, Wildlife Habitat Incentives Program, and Wetlands Reserve Program (discontinued Feb. 7, 2014). Several state programs also qualify for exclusion. The exclusion amount is the present value of the greater of $2.50 per acre or 10 percent of the average annual income from the affected acres over the last 3 years.

Example 11: The total qualified capital expenditure for your 200-acre woodland was $10,000. The Conservation Reserve Program paid $6,000, and you paid $4,000. If you had no income from the property in the last 3 years, you could exclude up to $9,785 ($2,50 x 200 acres) or 5.11% from your income. The interest rate is from the Farm Credit System Bank. If you had $9,600 of income from the property in the last 3 years, you could exclude up to $6,262 (10% x ($9,600 + 3)) or 5.11%. Attach a statement to your tax return describing the cost-sharing program and your exclusion calculations.

Timber Casualty and Theft Loss
Loss of timber from a casualty—a sudden, unexpected and unusual event such as a fire or severe storm—may be deductible from your taxes. The deduction is the lesser of the decrease in the fair market value caused by the casualty or your basis in the timber block (the area you own divided by the per acre cost) in your possession. Several programs include the Forest Health Protection Program, Conservation Reserve Program, Conservation Security Program, and the Wildlife Habitat Incentives Program, and Wetlands Reserve Program.

Conservation Easement
Donors of qualified conservation easement can take a tax deduction. The deduction is up to 50 percent (or 100 percent for qualified farmers and ranchers including the livestock and farm machinery) of the payment. Any excess donation over the 50- or 100-percent limit may be carried forward to 15 years.

Filing Form T (Timber)
You must file Form T (Timber), Forest Activities Schedule, if you claim a timber depletion deduction, sell cut products in a business (under Sec. 631(a)), or sell outright timber held for business use. However, if you have only occasional timber sales (one or two sales every 3 or 4 years), you are not required to file.
MEMBERSHIP APPLICATION

January 20-22...Jackson County. Alabama Youth Trappers Education Workshop in Scottsboro. Contact Mike Sievering at (205) 339-5716.

Always Call Ahead to Confirm Program Details.
IF YOU ARE CONSIDERING buying land in the black belt of Alabama, check with the local office of the Natural Resources Conservation Service to see if trees will grow on the soil. Some will support trees, some won’t. Source: Forestry In the Black Belt: Planting Trees on Prairie Soils by Paul Stuckey and Dale Hurst, Alabama’s Treasured Forests, Summer 2016.

A FAIR LONGLEAF CONE CROP is predicted for fall 2017 by cone crop expert Dale Brockway. 47.8 cones per tree are predicted. Prescribe burn areas to be regenerated just before the 2017 seed fall. Source: Alabama’s Treasured Forests, Summer 2016.

NUTRIENT REMOVAL FROM PINE STRAW RAKING: “Studies have shown that annual pine straw raking (removing the top fresh, undecomposed needles) removes an estimated average of 15 lbs/acre nitrogen, 2 lbs/acre phosphorus, 7 lbs/acre potassium, 10 lbs/acre calcium, and 2.5 lbs/acre magnesium.” Although growth rates are slowed for one to three years after raking, they will resume to “normal” without fertilization. Source: The Longleaf Leader, Fall 2016.

“THE GREATEST OBSTACLE to discovery is not ignorance—it is the illusion of knowledge.” Daniel J. Boorstin as quoted in The Progressive Farmer, 10/16.

A FOREST MANAGEMENT PLAN is a blueprint that aids in documenting goals, organizes information about the forest, and serves as the basis for the landowner to communicate within the family and with their forester. Being a communication tool is by far the most important purpose of a forest management plan and a critical part of long term success.” Source: The Longleaf Leader, Fall 2016.

NONE WERE NOMINATED: Last month we asked for the names of forestry school faculty members who are unabashed champions of private forest ownership. Surely there must be one or two in the U.S. We’ll hold the nominating process open for another month.

“THE MANAGEMENT PLAN is a blueprint that aids in documenting goals, organizes information about the forest, and serves as the basis for the landowner to communicate within the family and with their forester. Being a communication tool is by far the most important purpose of a forest management plan and a critical part of long term success.” Source: The Longleaf Leader, Fall 2016.
